

Information from the NHS

Promoting the NHS's 111 service.

The NHS will be aiming to increase resident's understanding that for urgent, non-emergency treatment the 111 service should be their first point of contact.

By directing residents to 111 we'll be able to reduce the number of non-emergency visits to our A&E's services.

We're currently planning a regional campaign, which is due to start in June/July.
